	<p>Lentils are this month's Harvest of the Month food. Did you know...</p> <ul style="list-style-type: none"> • Lentils are in the protein and vegetable food groups and were one of the first crops cultivated by humans. • Montana is the top producer of lentils in the United States, producing almost 40% of the lentils grown in this country! • Like other legumes, lentils add nitrogen to the soil, improving soil health. This makes them a good rotational crop with wheat and other grains. <p>To learn more about Montana Harvest of the Month visit: www.montana.edu/mtharvestofthemoth</p>

Lentils are this month's Harvest of the Month food. Did you know...

- Lentils are in the protein and vegetable food groups and were one of the first crops cultivated by humans.
- Montana is the top producer of lentils in the United States, producing almost 40% of the lentils grown in this country!
- Like other legumes, lentils add nitrogen to the soil, improving soil health. This makes them a good rotational crop with wheat and other grains.
