

# Configure your personal Windows 7 PC to connect to the BYOD network

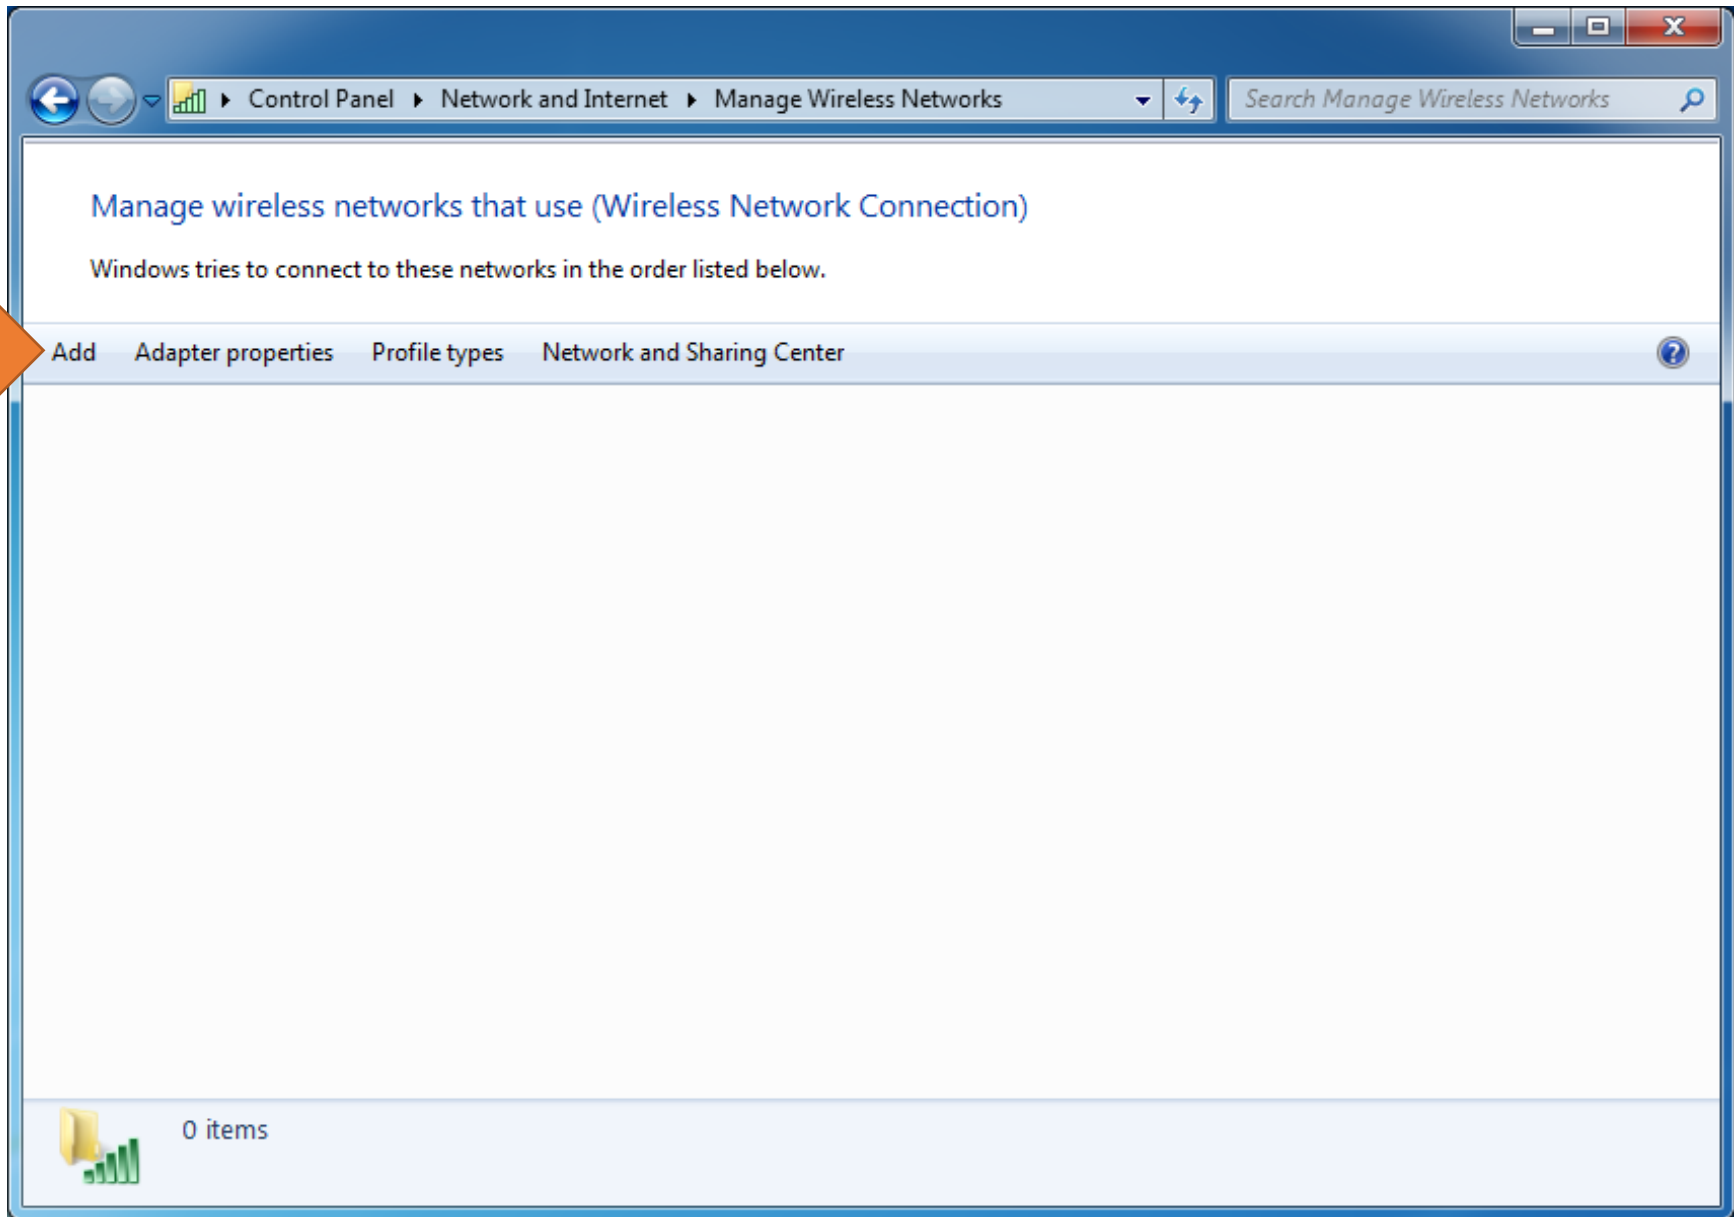

- 1) Click the wireless network icon in the lower right hand corner of the Taskbar and choose “Open Network and Sharing Center.”

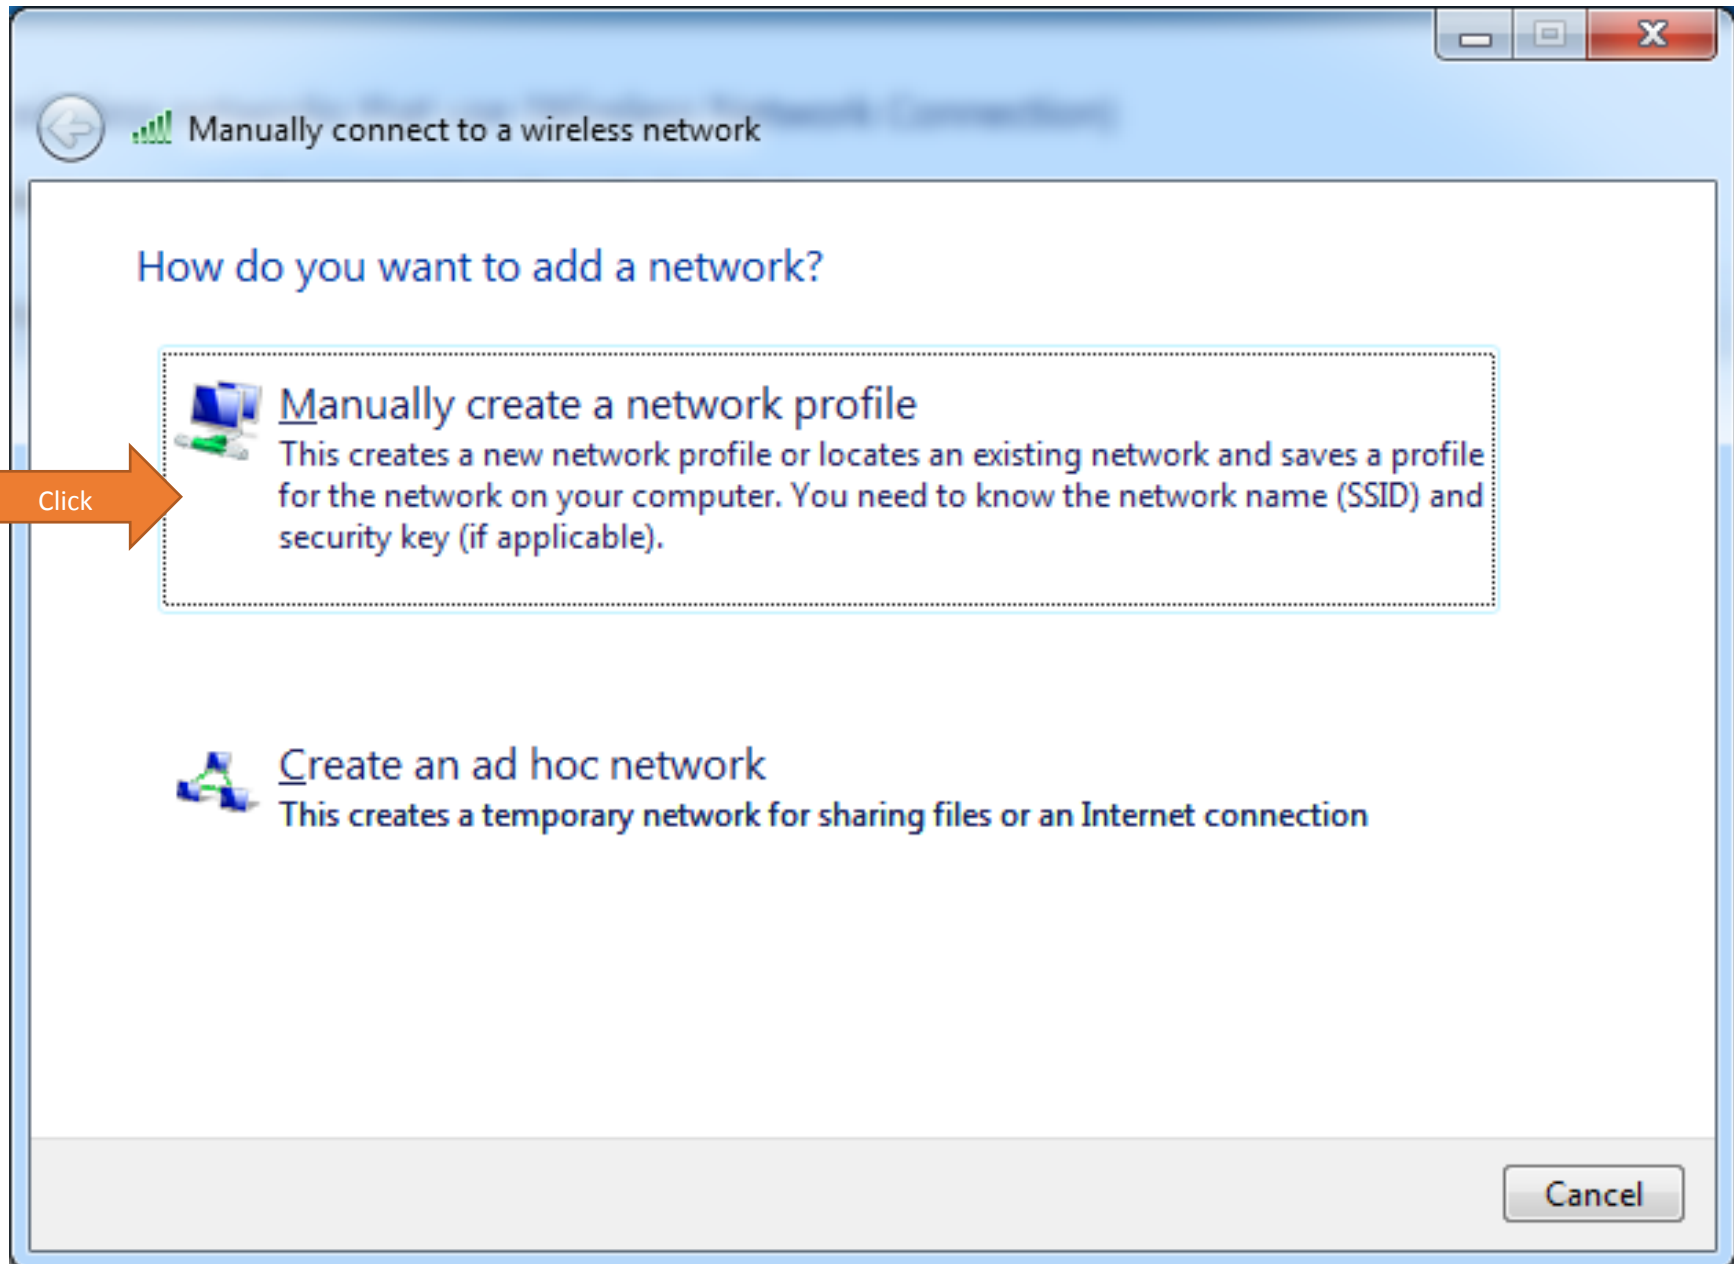

2) Click "Manage Wireless Networks" in the upper left corner.

3) Click the "Add" button.

4) Click "Manually create a network profile."

5) Fill out the fields as below. The “Network name” is case sensitive. Be sure to choose **WPA2-Enterprise**, *not* WPA2-Personal. Click “Next.”

The screenshot shows a Windows Network Setup wizard window titled "Manually connect to a wireless network". The main heading is "Enter information for the wireless network you want to add". The form contains the following fields and options:

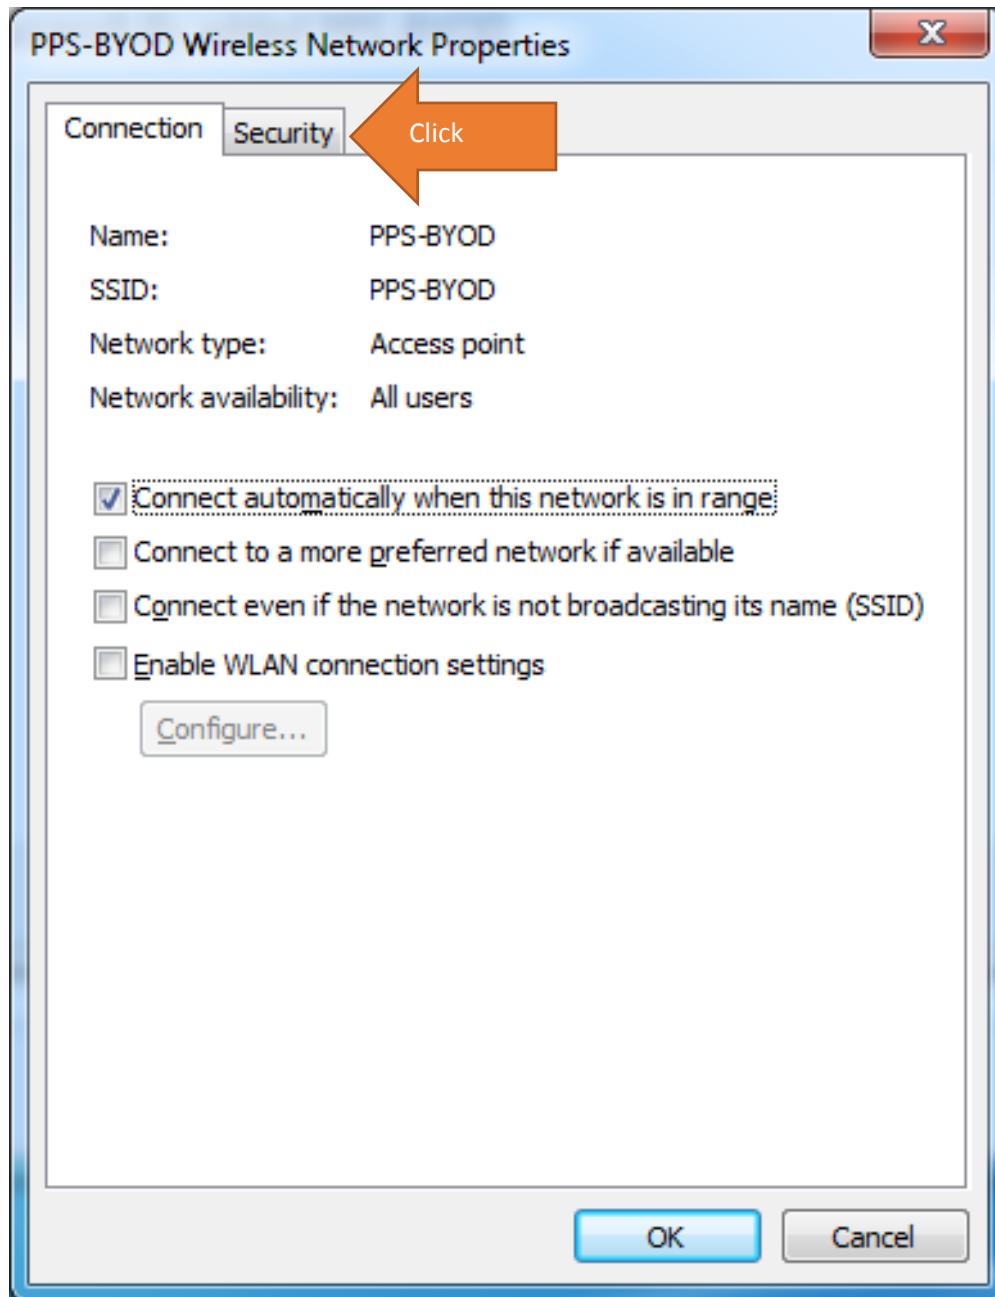

- Network name:** A text box containing "PPS-BYOD". An orange arrow points to this field with the label "Case Sensitive".
- Security type:** A dropdown menu with "WPA2-Enterprise" selected. An orange arrow points to this dropdown with the label "Select".
- Encryption type:** A dropdown menu with "AES" selected. An orange arrow points to this dropdown with the label "Select".
- Security Key:** An empty text box. To its right is a checkbox labeled "Hide characters" which is currently unchecked.
- Start this connection automatically:** A checked checkbox.
- Connect even if the network is not broadcasting:** An unchecked checkbox. Below this is a warning: "Warning: If you select this option, your computer's privacy might be at risk."

At the bottom right, there are two buttons: "Next" and "Cancel". A large orange arrow points down to the "Next" button with the label "Click".

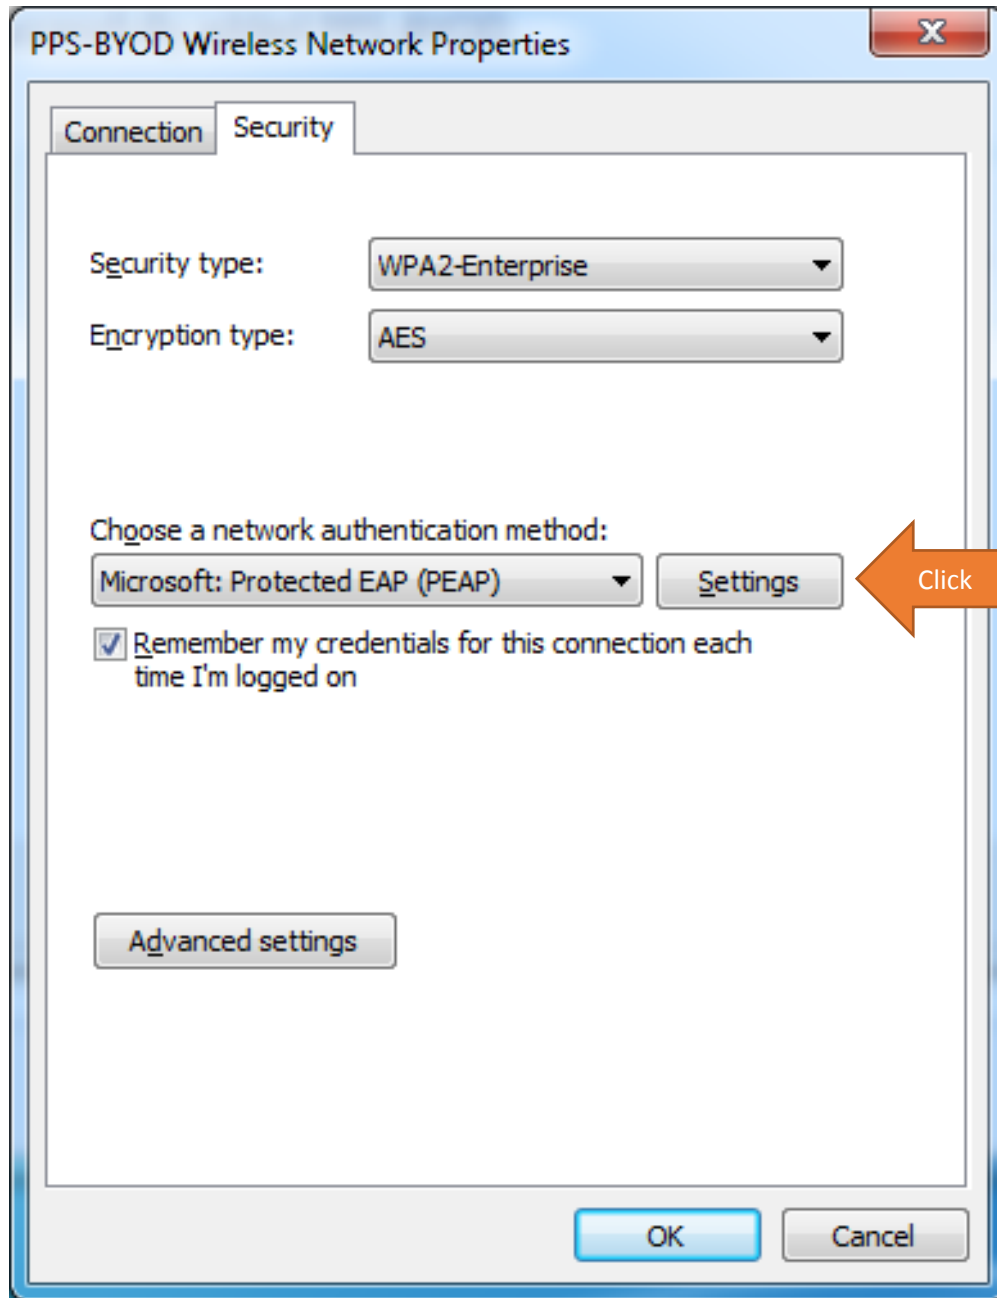

6) Click "Change connection settings."

7) Click the "Security" tab.

8) Click the "Settings" button next to Microsoft Protected EAP (PEAP).

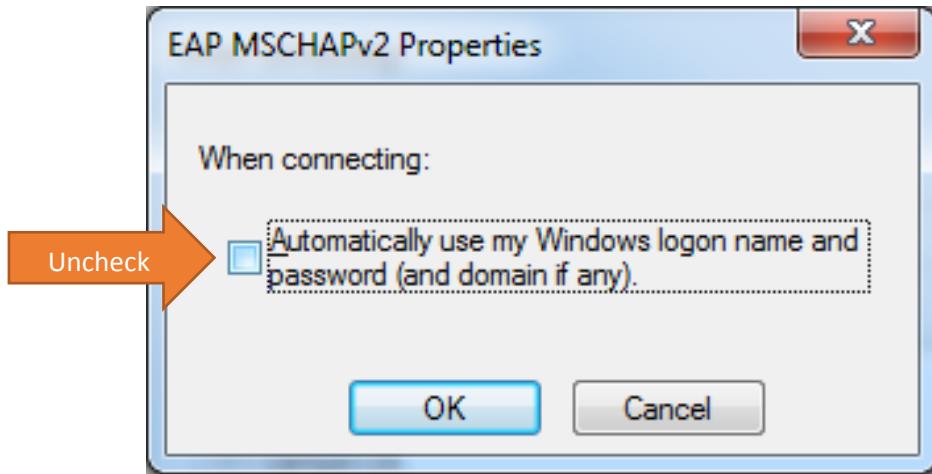

9) Uncheck "Validate server certificate." Click the "Configure" button next to "Secured password (EAP-MSCHAP v2)."

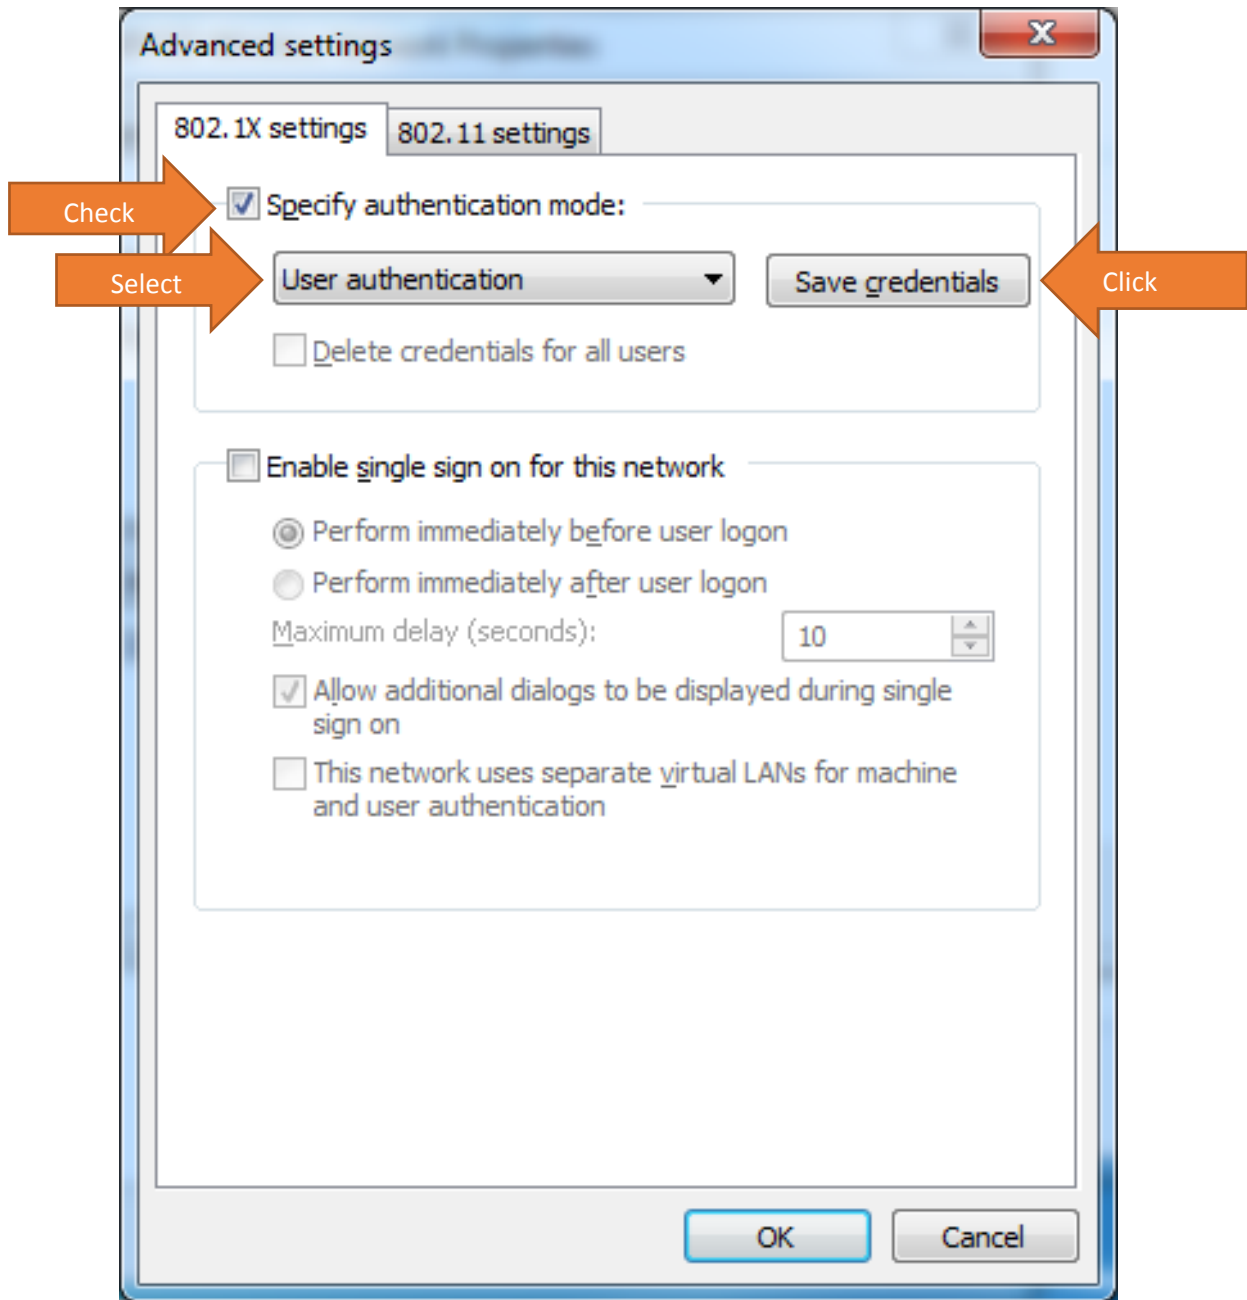

10) Uncheck "Automatically use my Windows logon name and password (and domain if any). Click OK and OK again.

11) Click the "Advanced Settings" button.

12) Check "Specify authentication mode." Select "User authentication." Click the "Save credentials" button.

- 13) Enter your normal school username and password. Click “OK” and “OK” again and then “Close.” If everything is set correctly, the computer will connect to the wireless network.
